OBJECTIVE

To work in a challenging environment as a Data Analyst utilizing my knowledge and logical thinking to my best in providing solutions in diverse domains and also where I can improve my Skills all the time according to Global Market Trends.

PROFESSIONAL SUMMARY

- About 3 years of professional software development experience in Microsoft Business Intelligence (**MSBI**), and **Power BI**.
- I have extensive knowledge of writing Stored **Procedures, Functions, Views**, etc.. as required by the Project.
- Hands-on experience in the development of Power BI reports using **Power BI Desktop**.
- Experience in Creating Tabular, **Drill Down, Drill Through, Parameterized reports**, Document Map Reports, Sub-Reports, etc... in both Power BI and SSRS.
- Experience in integrating different data sources such as **SQL Server, Excel**, and others into Power BI Desktop to develop reports.
- Hands-on experience in creating **Tabular models** using SSAS by importing tables
- Good at Writing **DAX** expressions according to Requirement.
- Implemented **Row Level Security** on data to restrict data access based on role or account.
- Extensive hands-on in writing SQL Scripts.
- Extensive knowledge of writing **Stored Procedures, Functions, Views**, etc...
- Strong Knowledge of **T-SQL, Performance Tuning**, and Query Optimization in SQL.
- Strong knowledge of concepts like **ETL Processes, Loops, Containers**, and Reporting tools.
- Good experience in creating various ETL packages for various requirements.
- Proven proficiency in Data Transformations like **Lookup, Derived Columns, Conditional Split, Sort, Data Conversion, Union All, Merge Join** and **Merge**.
- Good at configuring Data sources using and building **ADF pipelines** in Azure Data Factory.
- Have Worked in Agile Methodology and have good exposure to working habits.

EDUCATION

Degree in Computers from Sangai International University, Manipur.

Aug 2019 - Apr 2022

TECHNICAL SKILLS

- | | |
|--|---|
| • MSBI Stack : SSIS, SSRS, SSAS, SSDT | • Cloud : Azure(ADF,ADB) |
| • RDBMS : MS SQL, DWH | • Visualization Tools : Power BI, SAP BO |

PROFESSIONAL EXPERIENCE

Working as BI Developer at International SOS India Pvt. Ltd from April'22 to till date.

PROJECTS INVOLVED

Project #2 :

Project Title : **BI Support**

Client : Bulla

Technology : SQL server, Power BI, SSIS, SSRS, ADF, SSAS

Roles & Responsibilities:

- Involved in Monitoring ADF Pipelines are address if any issues
- Involved in Creating Power BI Reports for various Requirements
- Developed various reports using Power BI Desktop for multiple requirements.
- Implemented features such as Bookmarks, Drill Down, Drillthrough, etc.
- Applied Row-Level Security (RLS), both static and dynamic, based on groups.
- Expert at writing DAX expressions tailored to meet specific needs.
- Created data models and managed relationships as required.
- Designed tabular models to align with reporting requirements.
- Extracted key insights from data sets to support business needs.
- Created calculated columns and measures to enhance data analysis.
- Utilized logging options to monitor SSIS package execution status.
- Configured SQL Agent jobs to automate SSIS runs on a scheduled basis.
- Created calculated columns and measures as required
- Created reports with various features like Bookmarks, Drill down, drill through, etc..

Project #1 :

Project Title : **BI Architecture Development**

Client : ISOS

Technology : Power BI, ADF, SQL, SSIS, SSRS, SSAS

Roles & Responsibilities:

- Involved in gathering requirements for ETL packages.
- Built ETL packages with various tasks and containers as per the requirement.
- Developed, Configured, and Deployed SSIS Packages with source transformations and Destinations.
- Designed reports with all features such as Drill Through, Drilldown, sub reports, etc...
- Developed various types of reports like parameterized, sub-reports, etc...
- Managed Subscriptions, Permissions, data source, etc.. at the report Server level
- Designed and deployed a variety of reports using Power BI Desktop
- Analyzing data from different datasets and providing some insights in the form of reports
- Creating Dashboards, Pins, Tiles, and apps using Power BiService.
- Good experience in monitoring and troubleshooting the ADF pipelines
- Writing T-SQL scripts to manipulate data for data loads and extracts.
- Manipulating, cleansing & processing data using Excel and SQL.
